MediaCityUK

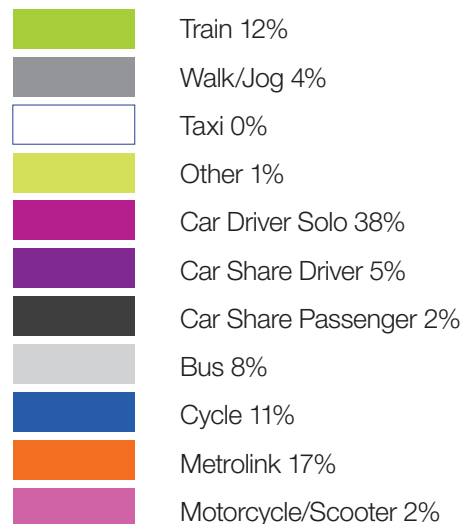

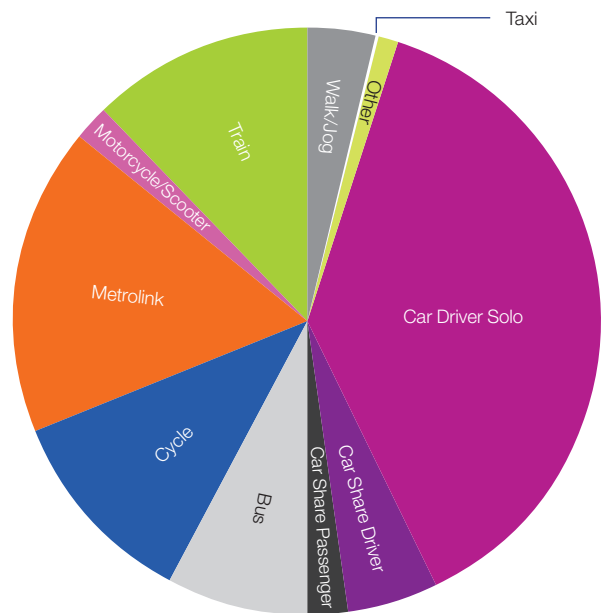

Sustainable Transport Plan serving our Sustainable Community

For both residential and business communities alike, a sustainable transport infrastructure features high on the 'most wanted' list. At MediaCityUK, multi-modal transport links are providing

a wealth of opportunities to our working and residential communities for improved, efficient, stress free travel as well as offering the potential for improved health, wellbeing and quality of life.

The provision of cycle hubs with covered areas, showers and lockers, electric car charging points, car club membership options and a Greater Manchester wide car share scheme all provide opportunities for our community to travel in a cost effective and sustainable way.

MediaCityUK originally aspired to encourage 45% + of residents and employees to use transport methods other than single occupancy car usage. Surveys show, however, that 52% of people are currently walking, cycling and using taxis and this figure rises to over 60% if initiatives such as car sharing are taken into account.

MediaCityUK

Sustainable Transport Plan serving our Sustainable Community **continued...**

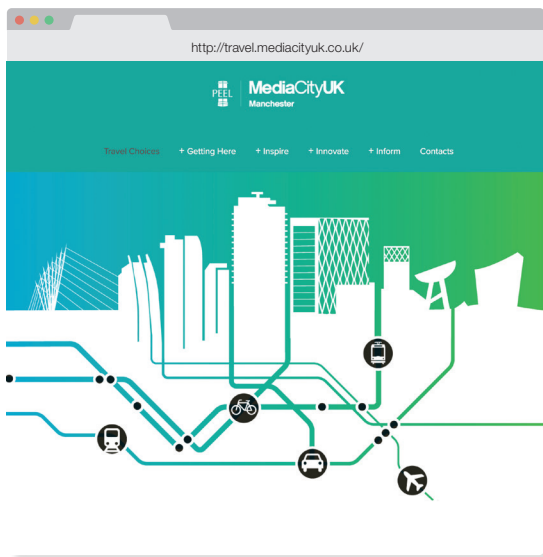

With 7,000 people currently living and working at MediaCityUK - and that figure due to increase substantially in the future - ongoing communication will be a key element of our future plans. Our aim is to ensure we maximise the benefits of sustainable transport for everyone living, working or visiting MediaCityUK and keep

pace with new options for our community. We will continue to work in collaboration with partners, including Transport for Greater Manchester, to keep a high profile approach to the benefits of sustainable transport for our whole community and encourage increased participation in its use.

Cherish your bike

If your bike is in need of some TLC then revolveMCR are on hand to take care of all your mechanical needs from puncture repairs to major maintenance and servicing.

Based next to the Cycle Hub every Tuesday, their Cytech qualified mechanics operate a pop-up workshop on site. Booking in advance is strongly recommended - call **07939 062 600** or email **hello@revolvemcr.com**. See **www.revolvemcr.com** for more details.

Details of all our sustainable transport options including information on walking routes, bus, rail and air travel, as well as updated travel information are available on our micro site at:
